Let It Snow Christmas Sign.
Easy to print and assemble.

The base, snowman, letters, and accessories are separated on different plates so you can choose what colors you want. Simply print the accessories and glue them on top.

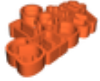

The letters are designed to fit easily, but they may require glue to stay in place. This will depend upon your printer and filament calibration.

I was inspired by MEAF designs Halloween Boo Sign to create something similar for Christmas. Check out their awesome designs.
