updated 8. 6. 2024 | published 8. 6. 2024

Summary

Hides the cables on the left, bottom and right side of the PSU.

Hide the cables on the left, right and under the PSU. Simply apply some VHB adhesive tape to the back in the area without holes (bottom) and stick it on. Quickly attached - quickly removed again.

Tested with an RTX 3090 (approx. 3mm gap to the graphics card).

Note: There is a new Version / remix by @JerryWzc_211140 where the cover can be screwed on rather than using VHB. This is probably a better way to install the cover than this Version.
