Summary

This snaps onto the bottom pole of the old standard issue school music stand by Wenger. Or, any 32mm pole.

Got back into playing violin after a 10+ year hiatus. I wanted to be able to keep my instrument out and in plain view, ready to go, so practicing would be super easy. I used another model for reference but built this from scratch in Fusion360. It should work okay without them, but there are two slots for zip ties to ensure it doesn't slip down over time. I've used it for months without any movement.
