Tags: [shaper](#) [trace](#)

**Extra tall pen holder has been added. This will allow you to trace taller parts, it also includes two finger holds to reduce side loading the pen while tracing and adding a bit more stability.**

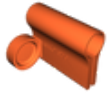

This is a simply pen holder for the shaper trace pen. It allows the pen to remain perpendicular when tracing a model and offsets the pen by 0.25" from the object you are tracing. Simply slide the pen in from the end with the small chamfer (writing should face downwards) and hold by the two tabs and trace away.

If you are having problems with the item shifting when tracing, go to any dollar store and pick up some sticky tack. Adding sticky tack to the object will stop it from moving when re-adjusting your grip.
