Designed a mount for the Elegoo Neptune 4 and 4 Pro to interface with the articulating arm designed by Sneaks (<https://www.printables.com/model/3407-articulating-raspberry-pi-camera-mount-for-prusa-m>).

No extra hardware needed. When mounting the control screen tray, feed the screws through the holes of this mount.

You'll have to move the screen temporarily while securing the articulating arm to the mount.
