## Summary

Mount an Olight magnetic charger to a surface for charging your devices.

[Household](#) > [Other House Equipment](#)

Tags: [flashlight](#) [olight](#)

Insert your Olight magnetic charger by first feeding the USB port through the printed part and then secure a 25x7mm circular magnet (I used <https://www.amazon.com/dp/B09ZX97G2B>) with countersunk M4 hardware (M4x10 or better yet an M4x12).
