Summary

Simple stake to replace broken stakes on outdoor floodlight. Screw directly into the same position as the factory stake.

Simple ground stake to attach to outdoor floodlights. I printed in PLA with 50% infill and 6 walls, bottom and top layers. The previous (from the factory) stakes broke when a hammer was used to dislodge them from the ground. I can't speak to the strength of these but they really just need to hold the flood/spotlight up.
