Beep the Meep 3D model made by Neill Gorton. The original file was made by the founder of Millenium FX and the current Doctor Who prop and costume maker. The file was originally shown on Russel T Davies Instagram account as a Christmas ornament.

Neill Gorton privately sent the file to me and asked everyone to publically share it.

Beep the Meep is an alien creature from the world of Doctor Who and had its first appearance in Doctor Who: The Star Beast, a comic book featuring the Fourth Doctor.
