[desiccant](#) [ams](#)

Dry up to 7 spool desiccant canisters at once in a filament dryer!

Print in ASA, ABS or PETG to prevent the part sagging upon heating.

You will need two pieces (of the same).

This [desiccant holder](#) works well for most spools. The snowflake one is designed specifically for Bambu spools and you can find it on Green Printables.

That is all, happy printing!
