[christamsdecorations](#) [snowmanpipe](#)

A three piece snowman piggy bank designed so that **supports should NOT be necessary.**

- The nose piece has a notch that allows it to slot and twist into the head of the snowman.
- The hat has been designed so it is free to spin but it cannot move side to side.
- The face of the snowman allows for the user to see its contents without needing to remove the hat. These holes have been dimensioned so that coins cannot fall out
