This is a case I designed for the Apple AirTag, the case is compliant with the official accessory design guideline with appropriate-sized acoustic cutouts and clearance. I have included a window to show the Apple logo on one side and an acoustic cutout on the other to ensure the speaker's function is not reduced.

Design features:

- Rugged
- Shadow lines (between two parts so it has a more consistent fit)
- Easy to attach

BOM:

- 4x heat-set insert (voron spec)
- 4x M3x5 Button Head Cap Screw

Print in PLA, PETG, ABS, or TPU. Depending on the material, you get either a hard case or a soft one.
