Summary

Dinosaur piggy bank where coins create part of the model!

[Household](#) > [Other House Equipment](#)

Tags: [coin](#) [coins](#) [bank](#) [piggy](#) [stegosaurus](#)

A stegosaurus piggy bank - display your large coins to create the back plates of the dinosaur!

The model is optimized to be printed with no supports. Stored coins can be easily shaken out through the top slot, or by opening the bottom scREW lid.

I printed both parts at 0.2 mm layer height (no supports). The main body fits just right on Prusa MK3 print plate.
