[Hobby & Makers](#) > [Automotive](#)

This is a part to mount your Valentine One Radar Detector under the headrest. It's a nice hidden location and the front laser still gets a good view ahead (when there isn't a passenger).

This fits my 2019 Ford Mustang. It probably fits most Fords with similar headrests.

Instructions:

Print the part

insert the V1 in the part

Remove the headrest from the seat.

Put the holder on the top of the seat and reinsert headrest through the holes in the tabs.

Connect power cable to the V1.

Note: this hasn't been crash tested and is intended for off-road use only.
