Credit to my son Jeff for the throat detail that eliminated the need for supports in my original design. Added two more pairs of files- STEP & STL - for the Knight scaled at either 90% or 95% of the original. So now you have a choice of Knights 2.250, 2.375 or 2.500 inches tall. I think the middle size fits better (is more proportional) within this particular set of chess pieces.
