Summary

I bought a small printer from AliExpress and wanted to mount it up on my SKADIS, so I designed a holder for it.

I bought a small printer from AliExpress and wanted to mount it up on my SKADIS, so I designed a holder for it. I also wanted it to be able to hold any extra paper/tape I have so I don't lose it, the tape I bought is 12-40mm.

There are many printers on AliExpress which share the same design, so I would think that they should be able to work on all of them.

For reference here is the printer I bought: https://www.aliexpress.com/item/1005005104049554.html?spm=a2g0o.order_list.order_list_main.100.67fd1802RI2Xx2

I used the [iFixit Mako Screwdriver Mount for Ikea Skadis](#) model as a base and built my model on top of the back of it since I was too lazy to remeasure and stuff, so other than the back part, everything else is new.

As for the [Skadis Hook with Dovetail](#), I just put it there for the ease of use.

Feel free to **support** me!
