[simple](#)

A little piece of moulding to stop your door from pushing through!

Works great if you are missing the original moulding and are too lazy to drive to the store like me!

This simple but effective design prevents your door from pushing through, and possibly right off the frame if you're not careful.

Simply remove your old moulding, and replace with 1 or more of these and they do the same job without compromise. (and in my opinion they look really neat)
