Summary

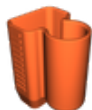

XT60 capacitor connector

[Toys & Games](#) > [Outdoor Toys](#)

Sometimes capacitor just wouldn't fit into drone's frame. The solution - to place it near the XT60 plug itself! This is my take onto this approach.

I designed it to fit around XT60 plug that goes with SpeedyBee f405 v3 flight controller. The capacitor could be easily soldered, folded over and fit into enclosure. For more details - refer to pictures included.
