Print, handwire and enjoy your new keyboard!

This is my latest evolution of my handwired 40% QMK (or ZMK) keyboards. This are my daily driver keyboards.

Here there are two models: the full one, a 48 keys low profile keyboard (ideal for a BT configuration) and the Split, a very portable magnetic split keyboard (see attached photo for building and magnets). Magnets are very strong and you can use it as a full 40% keyboard.

If you want to print the Split, just mirror on X axis the DX!

I can share also original Fusion 360 files, just ask!

Enjoy!
