updated 26. 11. 2023 | published 26. 11. 2023

Summary

An ice scraper with a sharp side and a top with teeth if the ice is a little thicker.

Ich würde empfehlen den Eiskratzer mit 50% Füllung und 10 Wandlinien zu drucken. Das Ding muss immerhin echt was aushalten. Wählt das Material nicht zu weich damit er nicht zu schnell abstumpft.

Ich hoffe er hilft euch wenn es morgens mal schnell gehen muss um nicht zu spät zur Arbeit zu kommen.

I would recommend printing the ice scraper with 50% filling and 10 wall lines. After all, the thing really has to take a beating. Don't choose a material that is too soft so that it doesn't dull too quickly.

I hope it helps you when you need to get to work quickly in the morning.
