Summary

extension/offset for a 100mm vesa mounted monitor.

[Gadgets](#) > [Computers](#)

Tags: [mount](#) [monitor](#) [extension](#) [offset](#) [vesa](#) [ultrawide](#)

I bought an ultrawide monitor and the arms on my monitor mount were not long enough to accommodate the ultrawide and my 24" monitors on either side. This is effectively a monitor arm extension.

Depending on the size of the screw head, you may need to put the monitor mounting screws in the holes before attaching the extension to the arms.

I printed in PETG. 0.2mm 5 top and bottom layers, 4 perimeters, 50% infill. It is holding strong.

*if your monitor falls off the arm, don't blame me. :)
