In our office at school we have a service desk. People often have to write something down ... Using the same pen for everyone didn't seem safe so I designed a pen holder where one side contains the disinfected pens and the other side holds the used pens.

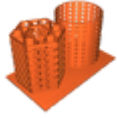

I added a version without text so you can add your own ...

TIP:

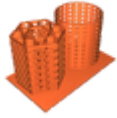

The disinfected pens are put upside down because the pens stopped working if the point was soaked in disinfecting liquid dripping down.

Dual color was achieved by a filament change after the baseplate
