### Summary

Simple HCOG model for R301

[Costumes & Accessories](#) > [Props](#)

Tags: [apex](#) [apexlegends](#) [legends](#) [scope](#) [sight](#) [hcog](#)

EDIT 2023 I decided to revisit this project 4 years later. I've added a new file which is more true to the original design. It looks better IMO. Unfortunately it looks like the original R301 model I used to base this off is no longer available, but you should be able to modify the file for a different rail pretty easily if you want to.

HCOG Classic from the game Apex Legends

The model is not a 1:1 reproduction of the game asset, but it's good enough for cosplay or display.
