This is a model paint rack, tested on vallejo 17ml and 32ml, ak metal extreme 32ml and vallejo 60ml. It pretty much fits most model paints. its pulls up into a table top 3 step rack and also pulls down for storage and transportation.

the geometry allows it to hold once raised, but there is an option for 8x neodymium 6mm by 2mm cylindrical magnets if you want.

the .3mf file is supplied purely as a guide , I used a prusa mk3S+ to print this in pla , it takes about 20 hours.
