Summary

Remix of the mount by LudiusB to fit under the gantry and between the z-cable chain.

I have my A/B motor cables in the underside of the 2020 extrusion so i needed and alternative extrusion side to mount the camera to. This mount allows the cam to be positioned under the gantry but mounted to the front facing side of the gantry.

Also i added a version of the front cover with a different logo but overall same dimensions.

The gantry_mount.stl includes a positioned body that can be used as a part modifiicator so you can make a visible honeycomb or other infill in the front facing part of the mount.

This remix is based on

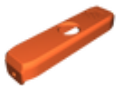

2020 Alu extrusion Webcam Mount for AUKEY 1080P Webcam
