I needed a simple tool to assist in centering the 125mm sand paper on my Bosch and Ryobi Random Orbit Sander. Lining up all the holes perfectly was a small nightmare.

With this tool, place the sandpaper on the pegs, then use the tool to align it with your Random Orbit Sander. On my sander, the pegs goes completely into the holes, but if they don't on you sander, use the provided holes to push the paper in place to attach on the velcro plate. Voila! Perfectly aligned sandpaper.

This was made as a small project while learning Fusion 360.
