### Summary

Craftsman 20V battery and tool holder to screw to the bottom of shelving in your workshop.

[Hobby & Makers](#) > [Tools](#)

Tags: [tool](#) [battery](#) [craftsman](#) [toolholder](#) [batteryholder](#)  
[20v](#)

I started with Ben Rigsby's battery hold and modified it slightly as I'd be putting this into a particle board shelf. I wanted extra screws so that I was sure it would stay in place.

I also designed the tool holder to allow me quick access to the tools I use most.

Needs supports. Print flat side down.
