Tags: [box](#) [container](#) [coin](#) [money](#) [gold](#) [storage](#) [bank](#)  
[piggy](#) [piggybank](#) [bar](#) [cash](#) [goldbar](#)

Simple supportless model of a gold bar that can be used as a piggy bank.

It has removable back lid so you can easily remove your stored coins/cash.

Print all the parts and then push the closing mechanism (with a little bit of force) to the hole in the lid. If it's too tight you can sand down the edge of the hole in the lid a bit.

### Print Settings:

0,2/0,3 mm layer height, 10% infill, printed with the text down, no supports needed (it has small bridge, but it prints just fine even without supports)
