Summary

I made this as a request for my sister and figured I'd share it for everyone to do so.

My sister found an item online that she wanted me to make (first image), but I couldn't find the file anywhere, so I made it myself and figured I'd share it with the rest of the world, hah. There were 3 iterations, the 2nd one was good, but I wanted to "streamline" it a bit, and much prefer the look of the final design. I also recently added a version where the cord end is 90deg to the original.

Originally printed on a CR6-SE at .12mm - it should be support-free, but YMMV depending on your printers cooling.

Added .f3d file and .step for those who might want to modify it for any reason. I forgot printing things in certain orientations can make it stronger and whatnot, but meh.

Print Settings

Printer Brand:

Creality

Printer:

CR6-SE

Rafts:

No

Supports:

No

Resolution:

0.12

Infill:

10%

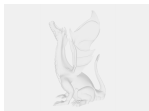

Filament: Botfeeder PLA Black

Category: Kitchen & Dining
