Summary

Found this cheap universal extruder but didn't find any mount adapter for Ender 3 v2 or any other printer.

This is a mount for a cheap direct drive extruder (HGT extruder) found on Amazon for the Ender 3 v2 printer.

Amazon Link: <https://a.co/d/9iEiMjA>

THIS IS A WORK IN PROGRESS!!!

Works with original Ender 3 v2 fans however, there's a modification you need to do on the blower fan part to fit properly and screw holes are not placed correctly due to the integration of the fan duct, I had to put insulation tape (other type of tape also works) on the blower and the duct in order to keep it in place.

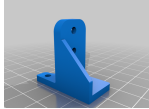

Print with supports ONLY on the fan duct. Other parts do not require supports.

Printed in PETG, don't know if PLA will deform.

I've included the f3d file so you can edit it in Fusion 360.

Please leave a like if you found it useful, I'll appreciate it.
