Tags: [picture](#) [brick](#) [hang](#) [pictureframe](#) [fireplace](#)
[brickwall](#) [pictureframehanger](#) [picturehook](#)

Needed to hang a picture on a fireplace and didn't feel like making a mess with drilling and using masonry anchors. This just wedges into the mortar joint to lock into the brick wall.

PETG works well at .15mm resolution

NO Supports or Brim

Hole is "tapped" for a #8x32 screw
