Summary

I have designed a holder for a step drill for my tool wall.

I have designed a holder for a step drill for my tool wall.

You can fix the holder with a Ø3.5mm screw.

The holder is suitable for a Ø10.5 shank.

I have also made a holder for Forsner drills as you can see on the picture on the left here the link: [Forstner drill holder von Magr099 | Kostenloses STL-Modell herunterladen | Printables.com](#)
