Summary

A sturdy lock with a strong mechanism

[Hobby & Makers](#) > [Other Ideas](#)

This lock works very well and is very strong

All you need is one or two nuts and bolts and you can make this secure lock with 216 possible combinations

Note:

- Don't use this for valuable stuff because it is easily broken with a hammer or saw
- If, for whatever reason, the tolerances don't work just sand down the parts
- Use support for the pin

Parts:

M20 Nut+bolt
