This an attempt of adding more than needed. I mean an ice-scraper can be pretty simple - but it doesnt need to be. I wanted to play with that for this weeks design challenge.

Want a more classic, simple design? Then try this one:

<https://www.printables.com/model/661491-mimimice-scraper-for-your-car-window-or-printer-be>

Overview

The print is made of 2 parts - a **handle** and a **blade**. The blade comes in 2 versions.

- **Frost** (straight clean edge)
- **Ice** (with 'ribs' on the pointy part of the blade)

Assembly

This should be pretty simple:

1. Print the handle and a blade of your choice
2. Slide the blade into the handle (maybe with a little glue)

Print instructions

This is a pretty simple print.

- **Orientation:** All files should be printed as they are imported.
- **Supports:** No
- **Layer height:** 0.2 mm
- **Colorchange:** You can change color halfway through the blade print, to get the effect from the pictures. (You could also paint the handle textures in Bambu Studio if you would like a more detailed color print)

Happy printing!
