Summary

This is a shelf (or window seal in my case) mount for an ipad gen 10.

Tags: [games](#) [mount](#) [ipad](#) [monitor](#) [programmer](#)

This is a prototype shelf mount for an ipad gen 10. I printed out of ABS because I have had PLA parts fail from sun exposure through windows in the past, however, do take care with the over hangs.

Assembly is done with 12 10mmxM3 screws (for axels) and 4 15mmxM3 screws (for ipad mount). The axels are fairly difficult to align while assembling (future iteration will be print in place), but I found using a thin wire made it much easier.
