Gridfinity base for Maker Mike's helping hands (<https://www.printables.com/model/344516-solder-helping-hands>).

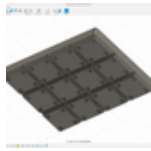

Gridfinity base is generated using Parametric Gridfinity Bottoms (<https://www.printables.com/model/491143-parametric-gridfinity-bottoms-gridfinity-model-bas>).

I provided 3mf model with 5 pins as separate models. I only printed with 2 by deleting the redundant ones.

Model is mounted on the Clickfinity Refined (<https://www.printables.com/model/506105-clickfinity-refined-baseplates>) plate.

Printed without supports in PLA, 0.2mm layer height.

This remix is based on
