Tags: [vase](#) [scandinavian](#) [bowl](#) [scandinavia](#)  
[scandinaviandesign](#)

Introducing the perfect companion for my Scandic-style vase: a sleek, 3D-printed bowl. It follows the same clean, Scandinavian-inspired design, allowing you to beautifully pair them in your space.

What makes this model special is the complete **absence of supports; they are not needed** at all. I have also designed the walls to be thin, giving them a glass-like appearance.

**I recommend using 100% infill for the best results.**
