Summary

3way WAGO clamp - fusebox clamp - tyrap clamp - Wireholder

[Hobby & Makers](#) > [Electronics](#)

Tags: [wireholder](#) [clamping](#) [wago](#)

By local regulations lose clamps in fuse boxes needs to be fastened. Not every fusebox has space on the DIN rail or cables are made short, therefore I designed this clamp. You can use it with screws or tyraps. push the wago clamp in the holder, until it clicks.

For safety regulations use PETG or better: PA, PLA won't be rated for the fusebox by fireresistance.

The design is tested by PLA, not PETG or PA at this moment.

Use is possible for 2way or 3way. Designed by measurement of 3way.

Printed on Prusa mini+ in 1H11M.
