Summary

Holds a small ring on top of a Schlage lever handle

[Household](#) > [Home Decor](#)

Tags: [clip](#)

Clips onto a door handle (mine is a Schlage lever) to retain a ring that hangs down on the handle - in my case, one that happens to hold bells. Before this the ring would annoyingly slip off when the door was opened or closed. Still moves a little, but a lot less.

Print with the small end facing down, not the big end. I printed with tree supports, not sure they are required but it's such a small amount of material it wasn't a big deal. I used eSUN PLA+ for this and it worked well.

The top "retaining" part could probably be a little shorter but the ring wasn't consistently slipping or turning on the door handle.

Designed in Fusion 360 which I'm not very good at.
