A remix of @willyG's Split Karambit (which is a remix of @Tony's Karambit) with softened edges for better ergonomics.

Print at 30% infill or higher depending on your preference. The loops have some non-manifold edges, Bambu Slicer was able to fix them just fine for me but your mileage may vary depending on your slicer.

Print the handle in this orientation for best finish:

This remix is based on

Split Karambit
