Please comment, rate, and post a make!

My wife has this [Trigger Point foam roller](#) (affiliate link) and this [yoga mat](#) (affiliate link) and wanted a way to hang it them on the wall. So, I created this parametric model to accommodate both.

The STL and 3MF models are sized to 145mm diameter and an M5 screw. The Fusion model has a user parameter to change the diameter, screw hole size, thickness, and width if needed.

Recommend printing at >60% infill.

Be sure to check out [my other models!](#)
