Summary

I recently upgraded from Quest 1 to a Quest 3 and had to modify my gunstock for the new controllers.

I've been using Sanlaki's gunstock design with my quest 1 for a couple of years and recently upgrades to the Quest 3. Since it has redesigned controllers, I needed to modify the original design. These fit the Quest 3 controllers and are compatible with Sanlaki's original design. Please see his Thingiverse page for the rest of the parts.

Depending on your printer, you may need some minimal supports. I used painted on supports for the rounded section that goes over the trigger.

This remix is based on

Magnetic Gunstock for Oculus Quest 1, Quest 2
