Summary

It is a phone holder mainly made for iPhone but I think can work with others and has a hole for charging

[Gadgets](#) > [Portable Devices](#)

Here is a 3D model of a phone holder with a hole so you can charge your phone.

I made this for iPhone but I think it can also work with other phones as well.

I made this for printing on FDM printers so I don't know if it will work on other types of printers.
