updated 27. 11. 2023 | published 27. 11. 2023

Summary

This version has the light bar surface turned at a 45 degree angle and a few other tweaks

[3D Printers](#) > [Creality Parts & Upgrades](#)

When clipping on to the gantry, put the tiny clip edge on first, so that the bar is angled downward and hinge it upward to pop the rear hooks over the top.

also, the keys still seem pretty tight, you might want to scale them down a couple percent.

This remix is based on
