### Summary

Tuned to match original part stiffness when playing.

[Hobby & Makers](#) > [Music](#)

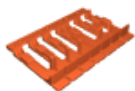

My friend's keyboard met the full force of a “hulk-smash” from their niece. I tuned this replacement to be more durable than the original and to match the stiffness/responsiveness of the original keys when printed in PLA (100% infill).

This covers the first two octaves of the keyboard but does not account for the final key (far-right) which is a standalone part.

I will make an effort to design the final key and upload soon! Feel free to poke me if you need it and I'll make an effort to hurry up.
