updated 27. 11. 2023 | published 27. 11. 2023

Summary

TPU feet that will work with 2040 Extrusions

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Tags: [sv06](#) [sovolsv06](#) [sv06plus](#)

I would have preferred to use something softer than 95A TPU, but it's all I had on hand.

⚠ Will not fit into the extrusions if you use a non-flexible filament.

My Sovol3d related repositories:

- [OSS Klipper Configuration](#)
- [Everything Sovol SV06](#)

Buy me a [Ko-fi](#) to support my work.

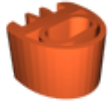

This remix is based on

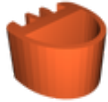

Anti-vibration TPU feet for Prusa i3 MK3S
