## Summary

The portent breakout board does not come with feet, so I made some that work with M2 screw and nut.

[Hobby & Makers](#) > [Electronics](#)

Tags: [arduino](#) [breakoutboard](#)

Print two of these, one for each side of the PCB.

Shaped to avoid the battery and SD card slot.

Uses M2 screws and nuts (optional).

PLA is stiff but works. PETG or ABS are softer and are better for press fit.

Here is a link to the board itself: <https://store-usa.arduino.cc/products/arduino-portenta-breakout?selectedStore=us>
