Summary

Salt pigs are cool for cooking. Why not have one based on the iconic Super Mario Bros pipe? Use food safe filament.

I think salt pigs are cool, but not for \$50! Why not introduce some more video game awesomeness into the kitchen with a Super Mario Brothers Salt Pipe instead? Make sure you print in a food safe filament, or coat with a food safe layer.

I have uploaded the solidpython and openscad files I used to make the Salt Pipe in case you want to vary the dimensions.

No support needed if you print with the opening face down.

Other **kitchen designs** I have made.
