## Summary

Self-designed Dante Avio mount for secure attachment. M3 screws and Velcro straps are used.

I needed a mount for a Dante Avio adapter that securely holds the device while allowing for easy removal of the adapter. Since I couldn't find anything suitable, I designed this mount. The mount can be attached using M3 pan head screws, and additional matching Velcro straps are required (ca. 20 x 200 mm). I used these: [https://www.thomann.de/de/thomann\\_v2020.htm](https://www.thomann.de/de/thomann_v2020.htm). The mount should work with all devices in the Avio series, as the housing is always the same. However, I have only tested it with the standard input and output adapters.
