Tags: [stand](#) [ipad](#) [foldable](#) [travel](#)

Looking for a iPad stand not using lots of space while travelling? This print offers stand to position your iPad in two position. Convenient while travelling as stand is foldable and utilising only limited space in your luggage.

Base parts printed with PLA 0.2mm resolution, no support. Joining parts printed with PETG 0.2mm resolution full support. Joining parts might be printed with PLA as well. I decided to use PETG in order to have higher mechanical properties for handling and travelling.
