I made a Vesa 75x75 compatible mount for the Asus zenscreen i have a MB16ACE but i think that it would work for other models to.

My screen size for comparison: 36cm wide 9mm thick.

Printed the model with supports and fits on bed of a Ender 3. The whole thing can be connected with some M3 nuts and bolts to a vesa mount. Bolt sink in the model so that it does not scratch the back of your screen.

integrated some hooks in each half to try and make the whole thing a bit more sturdy.
